PNC Bank Provides Financing To Oilfield Services Company

PITTSBURGH, June 26, 2019 – PNC Bank, National Association, announced today the closing of a \$42.8 million senior secured credit facility for Houston, TX-based Liberty Lift Solutions, LLC (Liberty), a portfolio company of Cadent Energy Partners.

Liberty was established in 2012 and provides artificial lift equipment and service, including sales of conventional and long-stroke pumping units and associated reciprocating rod lift parts, sales and rentals of hydraulic jet pump systems and sales of gas lift systems, primarily to the North American oilfield market. While the company designs and engineers its artificial lifts, it outsources the production process to both foreign and domestic suppliers.

"Liberty proactively shifted its focus during the 2015-2016 oil and gas industry downturn to investing in research and development, and improved the quality and functionality of its pumping units," said Carlos Elizondo, senior vice president and business development officer, PNC Business Credit. "PNC is pleased to provide the company with an upsized facility that supports its evolution as the industry continues to rebound."

Liberty will use the funds to refinance existing senior bank debt, partially fund capital expenditures and provide for its ongoing working capital needs. PNC Bank, N.A., served as administrative agent. PNC treasury management and derivative products and services were included in the transaction.

"PNC created a customized financial solution that reduces Liberty's cost of capital and provides the company with the flexibility to address its rapid business growth," said David Jones, chief financial officer, Liberty Lift Solutions. "We are now well positioned to aggressively pursue additional market share while maintaining a strong balance sheet to address the volatility of the oil and gas industry."
